PROFESSIONAL SUMMARY

Frontend Developer with 1+ year of hands-on experience building responsive, user-centric web applications using React.js, JavaScript (ES6+), HTML5, CSS3, and Tailwind CSS. Skilled in developing reusable components, implementing modern UI architectures, and optimizing application performance for seamless user experiences. Experienced in working with React Hooks, state management concepts, and responsive design principles to deliver scalable and maintainable frontend solutions. Passionate about writing clean, efficient code and continuously expanding expertise in modern web development technologies.

SKILLS

- React JS & State Management
- JavaScript (ES6+)
- REST API Integration
- Git, GitHub (Version Control)
- Redux Toolkit, Context API
- HTML5, CSS3, Tailwind CSS, Bootstrap
- WordPress, Elementor
- Odoo (Custom Code & ERP Solutions)

TECH STACK

- React.js
- JavaScript
- HTML5
- Redux Toolkit
- CSS3
- Zustand
- Elementor
- Context API
- Tailwind CSS
- Redux
- Bootstrap
- Odoo
- GitHub
- Git

PROFESSIONAL EXPERIENCE

Frontend Developer

November 1, 2025 – March 15, 2026

TABSAP | Buner, KPK, Pakistan

- React.js Development: Developing and maintaining Single-Page Applications (SPAs) using React.js, handling state management with Redux Toolkit, and managing dynamic user flows.
- Odoo Custom Code: Collaborated with senior developers to write custom code for Odoo modules, assisting in tailoring ERP functionalities to meet project requirements.
- API Integration: Building interactive user features and components using JavaScript (ES6+), while connecting frontend inputs with REST APIs for real-time data handling.
- WordPress & CMS: Designed and built the company portfolio website using WordPress and Elementor, applying custom code tweaks for custom design layouts and performance.
- Modern Styling & UI: Crafting responsive web interfaces using HTML5, CSS3, and Tailwind CSS to ensure mobile-first design and pixel-perfect layouts.

Frontend Developer

December 2025 – Present

Remote (Collaborating with Senior Developer)

- Component-Based UI: Developing modular and reusable frontend UI components under the mentorship of a senior developer, adhering to modern clean code standards.
- State & Hook Management: Implemented core React functional logic using hooks (useState, useEffect) to build dynamic features and manage component lifecycles.
- Pixel-Perfect Coding: Converted custom Figma UI designs into highly responsive web pages using HTML5, advanced CSS3, and Tailwind CSS utility classes.
- Mobile-First Optimization: Focused on mobile-first responsiveness and cross-browser testing to deliver seamless rendering across all mobile, tablet, and desktop screens.
- Version Control Workflow: Maintained constant branch management, pull requests, and codebase stability using Git and GitHub within a collaborative development workflow.

KEY PROJECTS

● Eventora – Full Stack Event Booking Platform

React.js Express.js, Node.js MongoDB

Built a full-stack event booking platform with JWT authentication, OTP verification, and role-based access control. Integrated REST APIs for event management, ticket booking, and user dashboards using React, Node.js, Express, and MongoDB.

● Enterprise Management System (EMS)

React.js, Redux Toolkit, Tailwind CSS

ems.tabsap.com

Architected and developed a high-performance, responsive Enterprise Management System (EMS) dashboard designed to streamline corporate workflows and data monitoring

● Product Operations Dashboard

React.js, Redux Toolkit, Tailwind CSS

<https://product-dahboard.netlify.app/>

Scalable inventory management platform engineered with optimized state orchestration, real-time data workflows, and performance-focused UI architecture

● Digital Commerce Storefront

React.js, Context Api CSS

<https://uomoecommerce.netlify.app/>

Composable e-commerce experience built with centralized state management, reusable components, and conversion-focused user flows

● Enterprise Brand Experience Platform

Wordpress Elementor Custom Code HTML

<https://tabsap.com/>

High-performance marketing website delivering responsive user experiences through custom front-end engineering and asset optimization.
